CSP Partners:

Chemical Professionals and Professional Organizations

- American Chemical Society
- Himpunan Kimia Indonesia
- Institut Kimia Malaysia
- Chemistry Society of Thailand

Host Governments

Nonprofit Science and Technology Organizations

- CRDF Global
- Arab Science and Technology Foundation (ASTF)

International entities focused on chemical security

Improving awareness of chemical security and safety best practices

Fostering collaboration among chemical professionals worldwide

CSP
CHEMICAL SECURITY ENGAGEMENT PROGRAM

Chemical Security Engagement Program

CSP-state.net

CSP Objectives

Decrease the chemical threat by:

- Raising awareness and providing training on chemical safety and security best practices
- Fostering national and regional dialogue focused on improving chemical safety and security
- Promoting and strengthening scientific cooperation among chemical professionals and institutions
- Sharing best practices and building capacity for chemical regulation

What CSP Does

Laboratory chemical safety and security:

- Deliver seminars and train-the-trainer workshops on safe and secure handling and management of chemicals for academic, industry and government labs
- Provide follow-on support for local trainers
- Visit facilities and recommend safety and security improvements

Building national and international networks of chemical researchers, students, and professionals:

- Provide funding for travel to relevant international conferences
- Assess needs and support development of national chemical societies

Chemical management:

- Provide guidance on management of chemicals, from manufacture and handling to disposal

Security by design:

- Review existing designs for new labs and recommend modifications to maximize safe and secure operations

Effective regulation of toxic chemicals:

- Provide travel support for international meetings for chemical regulators
- Facilitate meetings with U.S. Government agencies and industry groups to share best practices in chemical regulation
- Organize conferences or workshops to facilitate international cooperation and coordination on chemical regulation
- Assist in drafting chemical legislation to comply with international conventions and treaties
